Overcoming Key Challenges

Following are the key challenges a bank will typically face in adopting eBAM

Operational

- Document gathering, indexing and loading to database
- Varied processes and applications due to large country footprint

Resources

- Effort and Time required to digitize documentation
- Maintaining separate processes for paper and electronic channel

Legal and Regulatory

- Varying Country Regulation
- Customer Due Diligence (Know Your Customer)
- Data Protection

Technology

- Challenges of new technology adoption
- User adoption

Standards

- ISO XML messages enhancements are needed to overcome limitations seen in the 1st release of messages
- Need for synchronizing messages and requirements with treasury solution providers one at a time

Corporate Adoption Practices

Electronic Bank Account Management adoption requires transformation of Corporate processes; this transformation will facilitate realizing the true potential of eBAM

Transition from paper-based Workflow to electronic Workflow

Introduce controls for monitoring

Determine the scope and match with bank's eBAM capabilities and branch footprint

Validation and reconciliation of corporate and bank data

Collect Legal Entities, Accounts, Singers and Restrictions

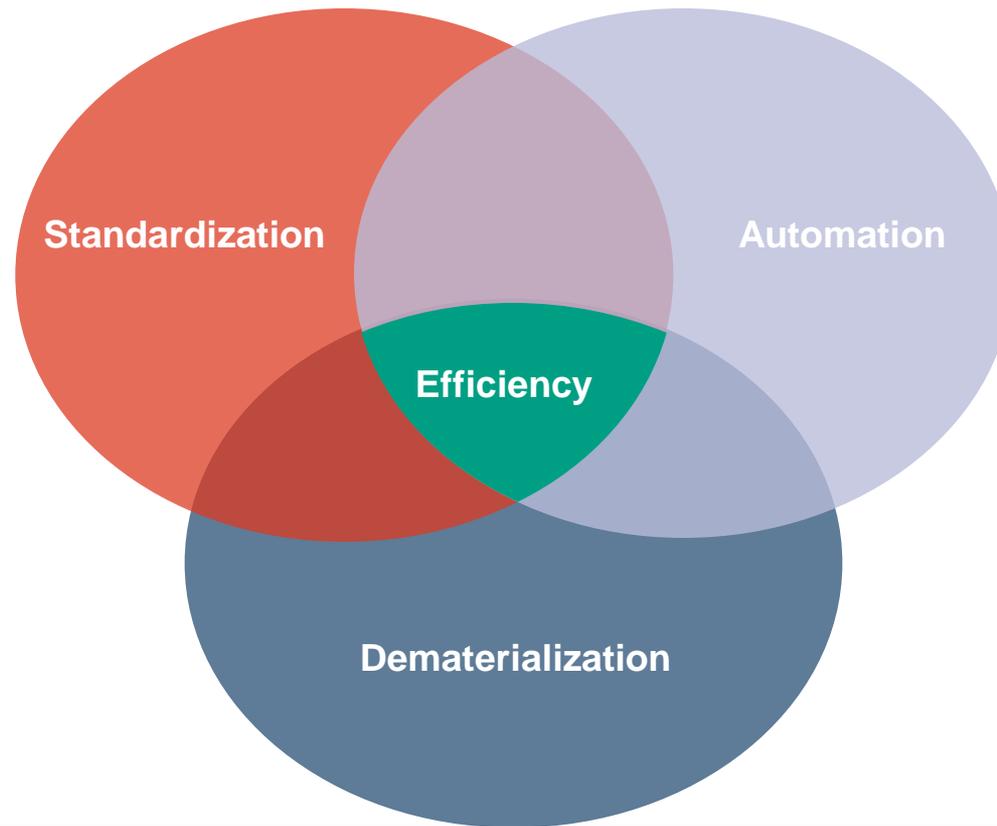

Evaluate hardware and software requirements

Identify Roles and Controls

Pilot with small account and country footprint

Summary

The efficiency of the new system will depend on the level of Dematerialization, Standardization and Automation.

Citi believes that sustainability is good business practice. We work closely with our clients, peer financial institutions, NGOs and other partners to finance solutions to climate change, develop industry standards, reduce our own environmental footprint, and engage with stakeholders to advance shared learning and solutions. Highlights of Citi's unique role in promoting sustainability include: (a) releasing in 2007 a Climate Change Position Statement, the first US financial institution to do so; (b) targeting \$50 billion over 10 years to address global climate change: includes significant increases in investment and financing of renewable energy, clean technology, and other carbon-emission reduction activities; (c) committing to an absolute reduction in GHG emissions of all Citi owned and leased properties around the world by 10% by 2011; (d) purchasing more than 234,000 MWh of carbon neutral power for our operations over the last three years; (e) establishing in 2008 the Carbon Principles; a framework for banks and their U.S. power clients to evaluate and address carbon risks in the financing of electric power projects; (f) producing equity research related to climate issues that helps to inform investors on risks and opportunities associated with the issue; and (g) engaging with a broad range of stakeholders on the issue of climate change to help advance understanding and solutions.

Citi works with its clients in greenhouse gas intensive industries to evaluate emerging risks from climate change and, where appropriate, to mitigate those risks.
